WORK EXPERIENCE

Senior Industrial Designer

Auriquant Design Pvt. Ltd. | Pune, Maharashtra

09/2024 - Current

- Lead industrial design initiatives within a fast-growing design studio startup, establishing and structuring the **end-to-end product development process** : from user research and market insights to concept development, prototyping, and production-ready design.
- Manage and mentor a **team of 8 designers**, guiding them in design thinking, product detailing, ergonomics, and execution while fostering a collaborative and insight driven design culture.
- Directed the development of **five full-scale physical products**, overseeing the entire design lifecycle from concept exploration through final execution and ensuring strong alignment between **user needs, engineering constraints, and manufacturability**.
- Collaborate closely with engineering and manufacturing teams to translate design concepts into **functional, production-ready solutions**.
- Applied **human-centered design principles**, including user observation, workflow analysis, and ergonomic studies, to ensure products are intuitive and reliable.
- Produce high quality **3D visualizations and product animations** to support product storytelling, stakeholder presentations, and design validation.

Senior Product Designer

Caresmith | Mumbai, Maharashtra

09/2023 - 08/2024

- Designed and developed consumer healthcare and wellness products, contributing to both **new product development from concept stage** and **industrial design refinement of existing product platforms** to improve usability, ergonomics, and visual appeal.
- Led the **industrial design of product enclosures and form factors**, ensuring a balance between aesthetics, user experience, functional ergonomics, and strong market positioning.

- Collaborated closely with **manufacturing partners in China** throughout the development cycle, providing design guidance, refining product architecture, and delivering **production-ready CAD data and engineering drawings** to support manufacturing and quality consistency.
- Conducted **prototype testing and MVP evaluations**, gathering user feedback to identify usability improvements and iterating designs accordingly to enhance product performance and user experience.
- Produced **high-quality 3D visualizations and product animations** to support product communication, stakeholder presentations, and marketing initiatives.
- Contributed to strengthening the **visual identity and perceived value of the brand's product lineup** through thoughtful form development, surface detailing, and cohesive design language.

Product Designer

Quest Global | Bengaluru, Karnataka

11/2022 - 09/2023

- Worked within the **drilling tools division for SECO tools**, contributing to the design and development of precision cutting tools including **drill bits, milling tools, and hole-making systems** for global industrial markets.
- Developed **3D product models and detailed visualizations** aligned with engineering specifications and manufacturing requirements.
- Collaborated with engineering teams to ensure **design feasibility, dimensional accuracy, and compatibility with production processes and international supply chains**.
- Contributed to the refinement of tool geometries and product presentations, supporting both **technical communication and product development workflows**.

Freelance Product Designer

Freelance | Mumbai, Maharashtra

07/2021 - 09/2022

- Produced **high-quality 3D visualizations and product renders** for consumer product concepts to support product presentations, design validation, and marketing communication.

Industrial Designer

Praan, Inc. | Mumbai, Maharashtra

06/2020 - 01/2021

- Part of the **core product development team** designing a next-generation **filterless air purification system** for commercial and industrial environments.
- Contributed to the **early-stage industrial design and product architecture**, helping translate a new air purification technology into a functional and manufacturable product form.

- Worked on **product form development, component integration, and enclosure design**, ensuring alignment between design intent, engineering requirements, and system functionality.
- Supported the design process through **3D modeling, concept development, and visualization**, helping bring the product from initial concept toward a viable product solution.

Industrial Designer (Project-Based)

Red Wall Mediaworks | Mumbai, Maharashtra

07/2020 - 08/2020

- Worked on the design development of Godrej security cameras and automatic safe lockers, focusing on form refinement, usability, and visual appeal for upcoming product lines.

User Interface And User Experience Designer

Campuslife | Mumbai, Maharashtra

02/2020 - 05/2020

- Designed and prototyped the MVP of a student productivity app that helps students and professionals organize notes, receive teacher guidance, and create quick revision systems - bringing simplicity and structure to academic life.
- Focused on user experience, interface flow, and visual consistency from concept to testing.

Industrial Designer

Mondelez International | Mumbai, Maharashtra

06/2019 - 09/2019

- Redesigned the VICI cooler for rural retail environments - a compact refrigeration unit for chocolate storage.
- The new design improved functionality, enhanced energy efficiency, and incorporated theft-resistant features, resulting in a smarter, more durable product for wide-scale deployment.

Furniture Designer

Reform Design Co. | Kota, Rajasthan

03/2018 - 08/2018

- Worked on the design and development of custom furniture pieces for interior projects, focusing on aesthetics, functionality, and manufacturability in collaboration with the design and production teams.

SKILLS

- CAD
- Product prototyping
- 3D animation
- Concept Development
- Design thinking
- Keyshot
- New Product development
- Industrial Design

- User Experience
- 3D Printing
- Research
- Team leadership
- Problem solving
- Product management
- 3D visualization
- Product Manufacturing
- Market analysis
- Aesthetic development
- Creative brainstorming

PREFERRED JOB

Senior Industrial Designer, Innovation Designer.

PERSONAL SUMMARY

I am a Senior Industrial Designer, graduated from ISDI PARSONS Mumbai, with over 6.5 years of experience designing user-centric, premium physical products across consumer electronics, smart devices, lifestyle, medical, and luxury categories.

My work focuses on translating complex user needs, technical constraints, and business goals into clear, refined, and production-ready product solutions. I am deeply involved across the full design journey - from early research and concept development to detailed 3D modeling, CMF, prototyping, visualization, and collaboration with engineering and manufacturing teams.

I am known for being a strong observer and problem solver, with the ability to identify friction points that are often overlooked and convert them into meaningful design opportunities. I enjoy working on products where form, user experience, usability, and engineering precision must coexist seamlessly.

Over the years, I have worked on a wide range of products including consumer electronics, smart appliances, lifestyle products, and medical devices, with a consistent focus on premium detailing, usability, and manufacturability.

I value thoughtful design, clarity in execution, and collaboration within multidisciplinary teams to deliver products that feel purposeful, intuitive, and refined.
